SUMMARY

Electronics & Telecommunication Engineering student building backend, AI and IoT projects with Python, FastAPI, Node.js and Supabase. Interested in embedded systems, IoT and automation.

EDUCATION

Bachelor of Engineering (B.E.) - Electronics & Telecommunication Engineering *2024 - Present*
Datta Meghe College of Engineering | CGPA: 8.5

HSC | K.P.C. English High School & JR. College *2024*

SSC | Bharati Vidyapeeth Prashala & JR. College *2022*

PROJECTS

TrafficIQ | React, Vite, FastAPI, SQLite, YOLO, OpenCV, JWT | Live demo | GitHub

- Built an AI traffic monitoring platform that detects vehicles with YOLO and OpenCV and measures traffic density.
- Developed a FastAPI backend with JWT authentication, and community issue reporting stored in SQLite. Deployed with a live demo.

Smart Library Intelligence System | React, Node.js, Express, PostgreSQL (Supabase), Prisma, Gemini API | Live demo | GitHub

- Built semantic book search by meaning, with 3-point Gemini summaries and automated Open Library catalog seeding.
- Implemented atomic borrow and return transactions with JWT login.

EventFlow AI | React, TypeScript, Python, OpenCV, Supabase | GitHub

- Developed a real-time crowd-control platform with a live command center, gate management and scenario simulations.

CivicEye | React, TypeScript, Supabase, PostGIS | GitHub

- Built a civic issue platform with citizen, field worker and authority roles, geolocated reports and status tracking.

Real-Time Environmental Monitoring using BME280 | Arduino, MQTT, AWS

- Built an IoT system for real-time monitoring of temperature, humidity and pressure, with cloud-based data monitoring (team project).

WORK EXPERIENCE

Google Gemini Student Ambassador 2026 *May 2026 - October 2026*

- Represented Gemini and AI initiatives on campus, engaged with student communities and took part in AI awareness and innovation programs.

SKILLS

- **Programming: Python, JavaScript, C, C++**
- **Backend & Data: FastAPI, Node.js, Express, REST APIs, JWT, PostgreSQL, Supabase, Prisma, SQLite**
- **AI & Vision: Gemini API, YOLO, OpenCV**
- **Electronics & IoT: Arduino IDE, MQTT, Embedded Systems, IoT, AWS**
- **Tools: Git & GitHub, VS Code, Excel**

CERTIFICATES & ACHIEVEMENTS

- 2nd runner-up, IETE Web Development Competition (2026). Check the exact name against your certificate.
- Presented the research paper “CLOUD BME” at the 2nd National Conference on Advanced Trends in Electronics and Telecommunication Engineering (NCATEX 2026)
- Tata Cybersecurity Analyst and Tata GenAI Data Analytics virtual experiences (Forage)
